

HBA Architectural Studies

| Upon completion of the HBA Architectural Studies students will be able to: | |
|--|--|
| 1. | understand the historical, technological, and cultural significance of a range of precedents in architecture, landscape architecture, and urban design. |
| 2. | demonstrate critical thinking and analytical skills by reading and discussing literary and cultural texts, as well as by critically viewing visual material. |
| 3. | demonstrate research skills and methods, such that they can successfully pursue specific areas of interest within the program and in future academic and professional paths. |
| 4. | recognize and articulate the conceptual frameworks and methodological approaches that motivate research in design, landscape, and urbanism. |
| 5. | understand how the selection of a methodological approach shapes potential outcomes. |
| 6. | sustain arguments for their own methodological approach and, by extension, their position in the field. |
| 7. | demonstrate an ability to communicate their design intentions, both visually and verbally. |
| 8. | synthesize concepts from a diverse set of sources in novel ways. |
| 9. | respond to design criticism as an integral part of the design process. |
| 10. | respectfully participate in collaborative critical discussions about the work of their colleagues. |
| 11. | present coherent arguments through writing, speaking, and visual means. |
| 12. | translate their analytical understanding and critical judgment into scholarly writing skills, oral presentations, and design proposals |
| 13. | communicate arguments and analysis both accurately and reliably. |
| 14. | evaluate the scholarly merit of a variety of resources |
| 15. | critically engage both historical and contemporary debates about design |
| 16. | work effectively with others while acting in a manner consistent with academic integrity and social responsibility as they make both individual and collaborative decisions in complex contexts |
| 17. | pursue a variety of employment opportunities requiring skills acquired in our program, including but not limited to graduate studies in architecture, landscape architecture, and urban design; employment in government, business, media, publishing, public relations, marketing cultural organizations, and non-profit institutions |
